PROJECTS

Secure file storage system — Detail

The project involves building a secure file storage system using Minio, an open-source object storage solution, AWS EC2, and Docker. The objectives include deploying an AWS EC2 instance, installing and configuring Docker, building a Docker container for Minio, configuring Minio for secure data storage and access, and testing the system for security and performance. The expected outcomes include an improved understanding of AWS EC2 and Docker, knowledge of Minio, and a practical example of a secure file storage system.
